

Baking Tezos (XTZ)

with Bitcoin Suisse

Baking

Bitcoin Suisse offers the first full-service baking solution for Tezos-coins (XTZ).

With our service, you do not have to invest resources in setting up a wallet, finding dedicated hardware and running and maintaining the setup needed for the process. We will handle everything for you, and you will be able to receive and monitor your rewards coming into the Bitcoin Suisse trading platform.

New XTZ are introduced on the network when XTZ-holders bake and perform endorsements, therefore the supply for XTZ continuously increases. The current inflation rate is around 5% per year. In order not to lose out to inflation, Bitcoin Suisse clients can bake with their XTZ holdings and receive a part of the newly generated XTZ.

Why bake with Bitcoin Suisse?

Bitcoin Suisse is an established and trusted counterparty and therefore offers many advantages compared to anonymous delegation services available. Furthermore, being a client of Bitcoin Suisse enables you to convert rewards to fiat or other crypto currencies in the same interface (subject to withdrawal schedules) and of course gives you access to all other Bitcoin Suisse services.

Become a Client

In order to take advantage of the baking offering of Bitcoin Suisse:

1. Go to www.bitcoinsuisse.ch
2. Select "Related Services"
3. Fill out and submit the form
4. An Account Manager will soon contact you

Requirements and fees

The minimum amount of XTZ needed to take part in this offering by Bitcoin Suisse has to be equivalent to 50'000 USD. We charge a flat fee of 20% on the rewards generated from the baking operation. Rewards include baking rewards, endorsement rewards and block fees. If you do not hold any XTZ and would like to start baking, Bitcoin Suisse will gladly assist you.
