

Collateralized Lending

Bitcoin Suisse offers crypto-asset collateralized loans to increase cash flow and provide fiat liquidity, against a pledge of crypto-assets.

Collateralized Lending

Collateralized lending enables clients to remain invested in crypto-assets while still having fiat liquidity at their disposal. Bitcoin Suisse offers crypto-asset collateralized loans in USD, EUR, GBP and CHF to increase cash flow and provide fiat liquidity, against a pledge of crypto-assets. The crypto-assets pledged as collateral are stored in the hyper-secure Bitcoin Suisse Vault.

Product Details

All market monitoring, trading and management is performed inhouse by Bitcoin Suisse and clients have a designated Account Manager at their disposal to answer any questions. Further, the collateral value is monitored 24 hours, 7 days a week. The client collateral is stored in a segregated account in the name of the client and remains locked while the credit is active. As the value of the collateral fluctuates, the collateral can be withdrawn, added or credit can be increased.

Potential Risks

A collateralized loan is a way of leveraging your portfolio, hence it has an inherent risk. We encourage responsible financial behaviour and kindly highlight that this product comes with risks, including but not limited to market volatility, currency risk and volatility of the pledged crypto-assets. This could require the client to deposit further crypto-assets as collateral or Bitcoin Suisse to liquidate the existing collateral or parts thereof.

Our Offering

- Large loan amounts
- Long duration
- Cost efficient interest rates
- Easy deposits and withdrawals of pledged assets
- Soft and hard margin calls
- Individual assessment of the lending value of your portfolio
- 24 hours, 7 days a week monitoring of collateral value

Interest Rates and Terms

Generally, the collateralization of credit is a minimum of 200% to protect clients against margin calls. Duration of credits issued is a minimum of three months. Credit sizes start at 250'000 USD or equivalent and are available up to single positions of 50 million USD. Multiple crypto-assets can be pledged as collateral. The interest rate is subject to an individual assessment for each credit agreement and is determined by the liquidity and value of the collateral offered, as well as the size of the credit. The indicative interest rate is 10% p.a.

Become a Client
